PROFESSIONAL SUMMARY

Computer Science graduate and senior full stack developer with over 15 years of professional experience building scalable web applications and business systems for clients worldwide. Specialized in developing SaaS platforms, real estate developer ERP systems, multi-location business intelligence dashboards, inventory management, POS solutions, and sales automation tools. Built production systems across multiple industries including real estate CRM and lead generation platforms (REfindly), global HR Tech and compensation analytics (SalaryBoard), dental practice management dashboards (Jarvis Analytics), and startup websites and professional portfolios for businesses and agencies. Expert in developing production software using Laravel, Vue, React, Next.js, Livewire, Tailwind, and FilamentPHP, enhanced with AI-assisted development tools like Claude Code, Cursor, and GitHub Copilot. Focus on execution over complexity, with systems that are maintainable, scalable, and solve real problems.
